

Men Who Make Your Money

Important Cog-wheels in Government Machinery. So
thing About the People Who Make the Coins and P
Currency.
BY RENE BACHE.

After the first day of next July, all the paper currency will be stamped with the treasury seal at the bureau of Engraving, where the notes and certificates are printed, instead of receiving this final mark of guarantee after being delivered to the treasurer of the United States as hitherto.

The head of the bureau of engraving is Joseph E. Ralph—a former machinist and steel worker, from Joliet, who now manufactures all the paper money for the government. He has been accustomed, up to the present time, to send the new-made currency over to the treasury (a distance of about half a mile) in sheets of four notes each. There, in the office of the treasurer, the big seal was put on, and the notes were cut apart, being thereupon recounted and done up with paper straps in packages of 100.

Now it is to be different. The seal is to be put on at the bureau of engraving, as aforesaid, and the notes and certificates will be delivered at the treasury's office already done up in straps of 100. They will also have the numerals on them, which hitherto have been added at the treasury. It is surprising how little most people know about what a piece of real money looks like and so it is necessary to explain that the numerals in question are printed in color on the left hand side of the face of the document. They are executed in the same color as the seal, in each instance—that is to say, in red on United States notes, in blue on silver certificates, and in orange on gold certificates. There is also in each case the serial number, in red, blue or yellow.

The whole point of the matter is that these finishing touches, hitherto added at the treasury, will be put on henceforth at the bureau of engraving. This will simplify things a good deal and save expense. Lee McClung, the new treasurer, has worked out the idea with Ralph, who has made much reputation as a money-saver.

Is a Remarkable Man.
A very remarkable man, indeed, is Ralph, who was born in Allegheny City, Pa., in 1863, and was taken to Joliet by his parents when he was only 7 years old. There he was apprenticed to a machinist, and later on entered the mills of the Illinois Steel company, where he remained for seven years. He achieved prominence as a labor leader, and, having served a term of assistant

postmaster of the house of representatives during the Fifty-first congress, he drifted into the service of the treasury department.

Ralph had charge of the customs business at the Chicago world's fair, and when he got through with that job, superintended the construction of the new Castle Garden at Ellis Island. There doesn't seem to be anything in particular that he cannot do. Twelve years ago he was made custodian of dies and plates at the bureau of engraving, and from that position he was advanced, on the death of Chief Sullivan, to the headship of the establishment.

Millions in New Money.
The bureau last year turned out \$708,000,000 worth of new paper money. All cash of this description, as far as it is manufactured, is delivered to the treasurer, Lee McClung, who has official charge of the government funds, and attends to their receipt and disbursement. He has one of the most responsible and laborious jobs in the service of Uncle Sam, and if, out of all the billions of cash that pass through his hands, any sum, small or great, is missing, he must make it good out of his own pocket.

So much has been published in the newspapers lately about McClung that it is unnecessary to give any biographical account of this young man from Knoxville, Tenn., not yet 40 years of age, who earned such celebrity as a football player at Yale. The work he has to do in the treasury, apart from the general direction of a gigantic money-handling organization, consists largely in signing checks and warrants. It is too large a task for one man, and so he is obliged to divide it with an assistant—Gideon C. Bantz. One of the advantages of being treasurer of the United States is that one's name appears on the lower right hand corner of every piece of paper money issued by the government.

Colored Man as Register.
On the lower left-hand corner is printed the fac simile signature of the register of the treasury—an officer whose name is William T. Vernon, and who is a full-blooded negro. It seems to have come to be accepted as a matter of course that this important place should always be held by a colored man—the original precedent having been set by the appointment of the famous Bruce of Mississippi. Bruce,

ASSISTANT U. S. TREASURER
GIDEON C. BANTZ

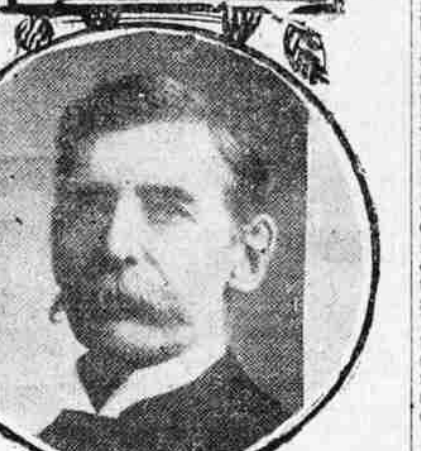

U. S. TREASURER
LEE MCCLUNG

JOSEPH E. RALPH WHO
PRINTS ALL THE PAPER MONEY

W. T. VERNON,
REGISTER OF THE
TREASURY

PIATT ANDREW WHO
MAKES ALL THE METAL MONEY

EDWARD R. TRUE
CASHIER OF THE TREASURY

when he was a senator of the United States, was on very friendly terms with Benjamin Harrison, who, after he became president, wanted to find a job

for Bruce and thought the place of register a suitable one. Vernon is about forty years of age, a heavily built man, weighing perhaps

250 pounds. He was born at Lebanon, Mo., in a log cabin, which had only one room. His parents had been slaves before the war. He earned his first dol-

lar by pitching hay and worked his way through Lincoln university, which is the state school for negroes at Jefferson City. Being graduated as valedictorian of his class, he took charge of Western university, at Quindaro, Kan., which at that time comprised one small building and half a dozen students. He was the only teacher. Thanks to his efforts in building up the institution, it has now 400 students and a faculty of twenty. Vernon is still president of it.

Has Permanent Job.

Now, as to Gideon C. Bantz, of whom mention was made a moment ago, his official title is assistant treasurer. He is one of those government employees who hold their jobs permanently, and who could hardly be replaced. Other appointees go, but there must always be a few people who understand the business of the establishment from top to bottom, and who can be absolutely trusted. If the high officers, including the secretary, his chief assistants, and the treasurer, passed out, and their places were not filled, these men could run the treasury right along, and nobody would know the difference.

It is the business of Bantz, in a word, to help the treasurer to take care of the people's money, and to receive payments and make them. He was born in Dayton, O.—the town which the Wright brothers have made famous. His mother's people went further across the Alleghenies, before Gideon was born. Later on, when he was a small boy, his parents traveled back in carriages to Cumberland, Md., and there took passage on the Baltimore & Ohio, which did not extend beyond that point in those days. The boy got a job at a week in a notion store in Baltimore. Not long afterwards, in May, 1873, he passed a civil service examination so successfully as to secure an appointment in the treasury, where he has since advanced through the ordinary course of promotion.

Cashier's Office Treasury.

Under the management and control of Treasurer McClung is the so-called cashier's office of the treasury, which is a big bank. The cashier of the bank is Edward R. True, who is another of the permanent cog-wheels of the government machinery. Born in North Yarmouth, seven miles from Portland, Me., he earned his first money as a printer's devil. Later on he learned to set type, and after serving an apprenticeship in

the Rockland bank (a state bank) he got a job as paymaster of the war department at Washington, where he was assistant paying teller in that humble position. He was in charge of all the local business for the government at capital.

The redemption of worn paper and coin, is a part of the business of the United States. When the old paper currency was made, it was put into bags, and being sent to the secretary of the treasury and the other set to the aforementioned colored halves, separately received.

In addition to this work, has charge of all the bonds of the government, and is a part of the business of the treasury. In his office are all transfers of bonds, and he sends to the treasurer a check. All coupons not from that kind, after being sent to him, to be carefully and kept.

Metal Money Maker.
The man who makes all the money for the government is Piatt Andrew, a young fellow, less than 35 years of age, who, before he came to Washington, was a professor at Harvard. He comes from La Porte, Ind., and is a high opinion of himself and can be appointed a member of the treasury, and last such, he is general manager of a pretty big job. He considers that during the last four of them, at New Orleans, San Francisco, Denver, and St. Louis, he has turned out \$1,114,557 gold, \$82,350 silver, \$1,390, and \$17,684,263 cent pieces, representing a total coinage of 621,148.

The Genevieves I Know

The Genevieve With the "Why-er-er" Ja
BY HELEN HELP
Copyright, 1910, by Associated Literary Press.

"James, I wish to goodness you could manage to stay at home at least one evening in the week," remarks his own dear Genevieve, her hair bound with a towel and a black spot on her nose. "You know I'm cleaning house and the children are getting ready for school examination and Sally left today right in the midst of things and mother's coming next week and I've simply got to get things done so I can entertain her properly and that miserable woman's club postponed its open meeting till tomorrow and I'm on the reception committee and how on earth—"

"Why-er-er-er—" But James can not stem the tide.

"It does seem to me that men are the most careless, heedless, forgetful, selfish things the Lord ever made," continues his own dear Genevieve with enthusiasm. "Here you've been down town all day and come home expecting supper to be ready, and then off you go again rushing out the minute you're done and haven't done a single thing that I can see since the minute you got up this morning and what on earth a man would say if his wife kept on rushing around like that?"

"Why-er-er-er—" But James can not stem the tide. "I don't see what on earth I ever got married for, mercy knows I was poor and happy at papa's where I never had to touch my finger to a single thing and had everything that heart could desire and a perfectly beautiful rousseau and where on earth I could get one good dress now let alone a dozen such as I had then when father was buying

clothes. I wish to goodness you'd speak to Jimmie, he's getting to be altogether more than I can manage, he talks right back to me and I never was used to it and never will I put up with it and I don't intend to let that child being impudent to me; but of course you never have the time for anything about your home."

"Why-er-er-er—" But James can not stem the tide. "I'm going right straight upstairs as soon as I get this table cleared and get ready for the committee meeting here tonight and you might just as well take off your hat and keep these children out of the parlor. Jimmy, if you break that plate I'll certainly slap you, why on earth do you keep on eating pie with a spoon, when I told you this noon no lady ever eats that way? For heaven's sake, James, don't stand there like a baby. Open your mouth, at least, and tell me what you're going to do?"

"Why-er-er-er—" But James can not stem the tide. "Mrs. Brown was in today and she says her husband never goes out in the evening, he just stays right with his family, and she says that a man who is so devoted to his family as Mr. Brown is sure to be rewarded in heaven, but while I agree with her that a man ought to stay at home evenings, yet I can't for the life of me, see how that poor man stands it, for such a talker I never heard of in all my life. You simply can't get a word in edgewise, Jimmy, you carry out those cups carefully, now; and Jenny, get a clean dish towel off the rack—you children might as well get the dishes started, I'm going upstairs and get my hair done. For heaven's sake, James!"

"Why-er-er-er—" But James can not stem the tide.

From a distance, the voice comes somewhat softened. "I can't find more than a dozen hairpins, Jenny, you been out to buy hair, I can tell there's not so many pins here as what there ought to be. Just you look out, young lady. Where on earth is my rat? Now, James, for heaven's sake, see that those children don't break that out glass fruit dish. I had to use it, everything else was out of reach. I wonder what the parlor looks like? It was as neat as a pin, but Jenny took her doll rags in there after school, Jenny, did you clean up afterwards? I can't hear a word you say."

"Why-er-er-er—" But she couldn't hear James at all.

"I'm coming down stairs, James. I want you to look me up, these women'll be here in a minute or two, and for the love of mercy, start right at the top. I know I shall fix it if you get it wrong and have to do it all over. I think I look a little better than what I did, but a man never notices or doesn't think that his wife would occasionally like as much notice from him as he gives to the evening papers. What I wonder is what's the use of a woman dressing like anything anyway, her husband never sees what she has on."

"Why-er-er-er—" "Now, don't stand there talking all night, get those lower books fastened. Joinny, have you fed the cat? Her meat's on the left-hand shelf as you go into the pantry. My, but I'm tired out! If I hadn't planned to have that committee meeting here before Sally went, I'd be in the world to try; I'd simply telephone and put it off, but I know

just what Mrs. Smith-Jones would say. She'd say I was so careless about things, my house wasn't fit to receive people, unless I had a month to clean up in. Jimmy, don't you get to playing or you'll drop those dishes."

"Why-er-er-er—" "What I wonder is, if those women are going to be late when they know we got so much to decide. I'm perfectly sure I'm not going to take such a

position as chairman of the reception committee again, but the pictures that we've had loaned us will have to be all strung on wires so maybe I'm better off than what the arrangements committee is after all, because I'm perfectly certain they got as many as three hundred little copies of great masters, and they'll have the time of their lives before they get them all up; then maybe I'll put pin holes where they oughtn't to

be. I wonder if we better have tea or coffee, though tea with waters would be plenty, and not cost very much, either. What I would like to know is if Mrs. Smith-Jones will wear her new imported gown and if she does I haven't a single thing to my name fit to stand next to her head of the line in, but that's always the way; money and brains never do go together, and I'd like to know what their committee work would be if Mrs.

Smith-Jones had it on her woman is perfectly foolish." Just then the bell rang, to the door, escorted the lady parlor, set chairs for the around and came right out he never opened his mouth. Then Mrs. Smith-Jones never could understand what sees in that man. He impresses a perfect dummy."

Shipwrecked Crew Subsists on Mosses

Special Cable to The Tribune.
LONDON, Feb. 19.—To be shipwrecked on a barren island near Cape Horn, and to be forced to subsist for thirteen days on mosses and shellfish, was the terrible experience of the crew of the London sailing vessel Deccan, which foundered

off the extreme south of the South American coast. The men were ultimately rescued by a steamer, and they have just been landed at Liverpool by the Pacific line steamer Orcoma. The Deccan left Port Talbot with a cargo of coal last August. She was bound for

South America, and had on board a crew of twenty-seven, including six apprentices. When the vessel was near Cape Horn the men landed at Liverpool by the Pacific line steamer Orcoma.
